

**Descrizione**

Top section made of FE 360 UNI EN 10219-1 steel elements and aluminium casting (C40), hot-galvanized conforming to standard UNI EN ISO 1461, all shapes, measurements and decorations corresponding to drawing which is an integral part of the project.

The top section comprises the following:

- 1) two half-collars made of hot-galvanized steel casting, each arm to be fastened with four stainless steel M10 through screws;
- 2) two arms made of galvanized steel sheet, length 122 cm, height 34 cm for supporting light fixture, comprising shaped elements welded to each other.  
The arms are assembled to the half-collars with four stainless steel M10 through screws. The power cables are routed through sheaths with special joints to the half-collars and to the light fixtures.
- 3°) a cylindrical closure made in precision casting (C40) and hot galvanized (h cm 7,0 - diam. cm 15,3), fastened to the post with three M6 stainless steel.

Note: Only lighting equipment from series Morfomatic System may be installed.

**Protection of surfaces**

Please refer to the specification on painting procedures of the materials.
