

Description

Fixed bench in UNI EN 1563 nodular cast iron and iroko wood (or equivalent) brown colour, corresponding in shape, size and ornamentation to the diagrams, which are an integral part of the specifications.

The bench is composed as follows:

1°) Two bench support elements in cast iron, height 80 cm, length 66 cm. Each element has two fixing lugs (A) height 12 cm, width 5 cm, with a distance between centres of 25 cm, for the wooden planks of the seat and backrest.

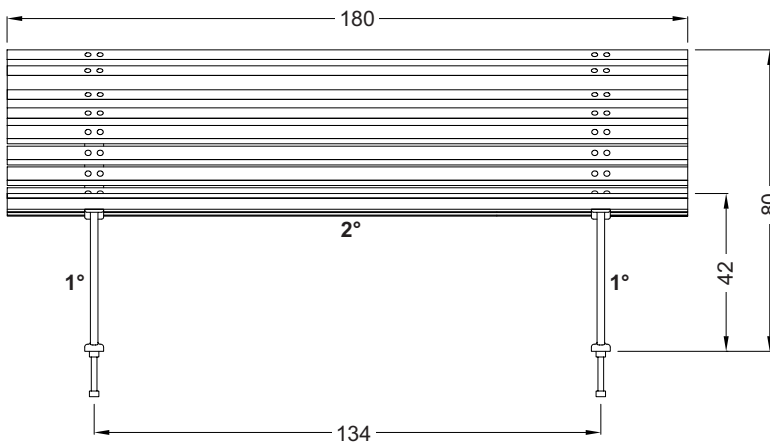

2°) A seat composed of 14 planks of solid seasoned iroko wood (or equivalent), length 180 cm, width 4 cm each and thickness 3.5 cm. Each plank is fixed to the support elements 1 with four M6 stainless steel bolts.

The assembled bench has the following dimensions:

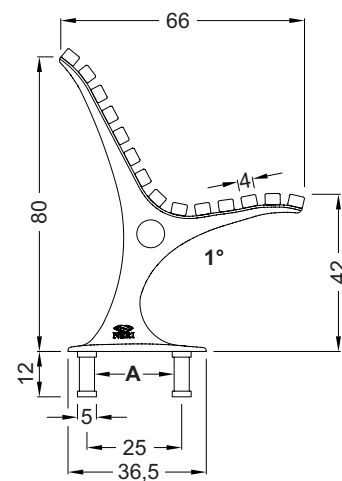

total height 80 cm – total length 180 cm – total depth 66 cm – distance between centres of supports 134 cm – seat height 42 cm – backrest height 80 cm – angle between seat and backrest 108°.

Protection of surfaces

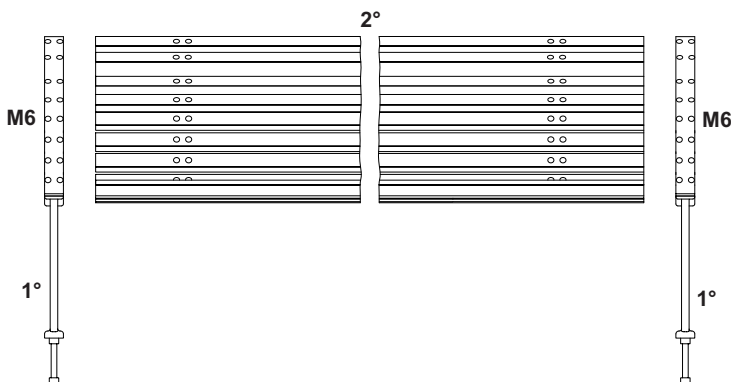

Please refer to the specification on painting procedures of the materials.
